1. A large radio station, which is the main Yugoslav Air Force installation for the area, is equipped with a whole net of antennae and is located to the southwest of Batajnica. Electric energy is supplied to it by the thermo-electric plant in Zemun. The radio station is not connected with the Belgrade short-wave station located nearby.
2. Another radio station, erected in the latter part of 1947, is located near the Yugoslav Military Air Command, behind the Bezanija village, five kilometers from the Batajnica airport. The radio apparatus is a 30 kilo-watt Dutch model and is connected with the Air Force Command by means of a direct telephone wire. It is likewise supplied with electrical energy from the Zemun thermo-electric plant.
